JEFFERSON COUNTY MINES

An Asbestos Mine Discovered In Washington — The Benton Group of Mines to be Incorporated.

In its weekly review of Jefferson county mines, the Boulder Age says: The Amazon mine, Amazon district, is turning out ome very fine ore these days. Elkhorn is shipping out about four cars

of ore daily, and the amount is likely to The Ida mine, in the Willow Springs district, sent a car of ore to Omaha this

week by the Northern Pacific. J. T. Filcher is working the Bamboo Chief mine in the Amazon district and is hauling ore to the Boulder sampling

McCarthy & Dean, who have a prospect adjoining the Bluebird, near Wickes, are said to have an 18 foot vein and not to said to have an 1s foot vein and not to have yet found both walls of the lead.

The deed for the transfer of the Josephine mine, in Upper Basin district, has been recorded. The sale is made by Fred Manuel to M. T. Allen, for the sum of

Sto.000.

The Indian Creek Minies company has transferred its property, emissising of the J. I. C., Jenny Lind and Hopeful quartz lodes in the St. Louis mining district, to the Goodyear Mining company.

The Blizzard, about half a mile south of the Minah, near Wickes, owned by Jacob Kauf, is said to be showing up very finely. Ore is being steadily shipped from the mine, and the recent shipments have run quite high.

the mine, and the recent shipments have run quite high.

The Helena, Boulder Valley & Butte railroad this week brought in a carload of iron ore from Toston for the Elkhorn Mining company for fluxing purposes. It goes to Elkhorn to-day by the Northern Pacific & Montana railroad.

Operations will probably be resumed on the Bigfoot mine, in the Bigfoot district, within a week or two. The property is unquestionably a good one and its development will reward those who have faith enough to invest their money in it.

The Rattler or Bobbie Burns, in the Red Rock district, owned by Roger McCaffrey, continues to improve with development. A hundred-foot tunnel is being run on the lead, the vein being about

run on the lead, the vein being about twelve feet wide, with a three-foot streak

tweive feet wide, with a three-lost stream of fine ore.

The White Dog mine, in the Bigfoot district, is showing up very finely. The tunnel has been driven seventy feet on the vein, all in ore, not a pound of waste having been taken out in that distance, and the face of the tunnel shows a five-foot vein of fine carbonate ore. The property is under bond to Warren S. Dodge and Charles W. Dodge.

Weak on the Grizzle mine, Bigfoot dis-

Work on the Grizzly mine, Bigfoot dis-trict, has been suspended for a few days on account of the amount of water, which could not be handled profitably with windlass or whim. A steam hoist was brought in to the mine yesterday and will be

in to the mine yesterday and will be placed in position immediately, when work will be resumed. Drifting is to be done from the 65 foot level.

The Boulder Sampling works shipped one carload of ore last Monday, and before the close of this week will ship five more cars. The prospect for the works to be kept running are very good. The miners or those having ore for sale are invited to send their ore to the works for treatment, or, if desired, the cash will be treatment, or, if desired, the cash will be paid based on the ruling market price of the metals, after deducting the lowest rates for freight and smelter charges.

#### Washington's Asbestos Discovery.

The Seattle Times of Saturday contains the following concerning the recent discovery of asbestos and belgas on the

The aspestos, which was the first discovered, is pronounced by assayers one of the richest mines that ever existed. This lies in a region which undoubtedly contains other minerals, as prospectors claim that wherever this is found other rich minerals abound. These two men started on their prospecting tour a couple of weeks ago, never dreaming that such a valuable substance could be found in the hills of Skagit county; but when they discovered three large veins of asbestos they were dumbfounded. This is the first asbestos and belgar

This is the first asbestos and belgar found during their travels throughout the state. At first they did not believe that the find was a rich one, but after a close examination, they soon became convinced that such was the case. The veins are situated within a few feet of one another, and present a magnifleent sight. A large sample was secured, and after storing it, safely away, they decided that the matter should not be made public until the test was accomplished.

Not feeling perfectly satisfied with the rich find they had unearthed, they concluded to prospect the land around the asbestos mine. After some time their

cluded to prospect the land around the asbestos mine. After some time their task was rewarded by the discovery of the "belgar." This was discovered about two feet under the surface of the earth. The vein at first was about twelve inches in width, but after digging along a few feet it became much larger, and finally developed into a very wide vein. The exact measurement could not be ascertained, although it is claimed to be one of unusually large size.

ually large size.

A sample of this was also procured, and after covering over the veins so as to hide them from view they left for Fairhaven to have the samples tested. Mr. Fuller, an assayer in the above-named city, was called upon, and after making a thorough test pronounced them very rich. An assay of "belgar" was made and the rock carried 30 per cent. of sulphur, four ounces of silver and a shade less than 10 per cent. of arsenic. While every effort was made to destroy the asbestos by fire, it proved fruitless, and it was pronounced indestructible by fire. The men have now staked off claims with the intention of operating their mines.

At present there is but one asbestos mine in the United States being worked, and as soon as operations commence in this mine the state of Washington can boast of an enterprise which the largest called upon, and after making a tho

boast of an enterprise which the largest states in the union do not possess.

The Metal of the Future. The thoughts and experiments of industrial chemists and of scientists generally, are directed toward the problem of the cheap production of aluminium, the socalled "metal of the future." The pro duction of aluminium and its alloys has for some time been an industry on a firm footing, in both America and Europe The metal is very widely distributed in nature, existing in various well-known combinations in clays, corondum, cryo lite, beauxite, even in some of the most precious stones, as the ruby, sapphire, garnet, topaz, lapis luzuli and tournaline, but all its combinations are so very firm that its non-costly separation in the metallic condition has been a chemical problem of great importance. The Castner-Deville, the Cowles and the Pittsburg processes produce and Castner-Deville, the Cowles and the Pittsburg processes produce allow and in varying proportions of purity, but their best ef-

forts have resulted in cheapening the pure metal not below \$1 per pound. This price is restrictive upon the use of the metal in many branches of industry, where it must compete with cheaper materials. A Chicago chemist has recently advanced the claim that he has discovered a method whereby the metal can be produced for 15 cents per pound but this produced for 15 cents per pound, but this claim meets with little favor from scien tists in general, who state that the amount of energy required to loose aluminium from its bonds to silicon and oxygen must cost many times above the sum men-tioned. But, however this may be, the metal, even at present cost, is fast be-coming a prime favorite in many lines of coming a prime favorite in many lines of trade, and is each day finding new appli-cations. It is marvelously light, non-cor-rodable, of great tensile strength and rig-idity, and withal of lustrous beauty. These are all qualities which well war-rant the belief that it verily is the metal of the future.—Pharmaceutical Era.

The Copper Market.

In spite of the heavy trials which the stock exchange had to undergo during the present week and the consequent very unsettled state of the money market, values of copper have remained unchanged, and we do not even hear that any concessions have been made in prices. The de mand has been rather slack and the transactions consequently small, but we still have to hold lake copper from first hands at 17c., and it appears that the quantities offering from seconds hands must have been reduced, as very little is obtainable at 16%. Under these circum-stances it is natural that some accumulation of stocks must take place with the mining companies, but as they have no reserves whatever for the past year, this is not at all alarming. Other sorts are quite unchanged at the prices recently given, viz: Arizona copper 15¼, and casting copper, according to brands and quantity, 14¼@14¾.

The London market opened on Monday rather lower: £56@56 2s 6d for spot, and 5s higher for three months. Improved afterward to £57 5s for spots, and £57 12s 6d for three months, but declined again £57.7s 6d@£56 los for spots and 5s higher for three nonths. We quote for refined

and manufacturing sorts as follows: Tough, £62;262 10s; best selected. £65;6 66; strong sheets, £70;271; India sheets, 2674168; yellow metal sheets, 6½d446½d.
Advices from abroad report a quiet market for refitted sorts during the last

few weeks.

The outcome of the great French cop-Paris Matin of November 12 says the report of the liquidator of the Societe des Metaux shows that, despite the rise in the price of copper, the shoreholders of the company will receive nothing. The debenture-holders and other creditors will receive out The final will receive only 31 per cent. The final liability of the company is estimated at \$111,000,000 francs and the assets at \$38,-000,000 francs.-Mining and Engineering

A Gigantic Scheme.

Concerning the Benton group of seven mines near Neihart to extensively develop which a company is about to be incorporated by J. T. Anderson, E. J. Anderson, J. C. E. Barker, E. J. Barker and David L. S. Barker with a guarantee of ample means, the White Sulphur Springs Husbandman says: "A force of 12 men have been at work on the property for the past six weeks and are doing good work. A tunnel has been started, at right angles to the leads of the group which cross the gain a depth of 1,300 feet when the furground at intervals of 100 feet, that will therest extent of the ground is reached. This tunnel encounters the first vein when in 100 feet, from which ore is now when in 100 feet, from which ore is how being taken that runs from \$300 to \$2,000 in gold and silver per ton, besides a percentage of platinum and other valuable metals. Specimens of this ore recently exhibited in this office were so rich that the rock, when broken was actually held together by the clusters of wire gold and silver. The upraise to the surface is 78 feet at this point, and levels surface is a feet at this point, and levels are being run both ways on the lead, while the main tunnel is being pushed ahead through country rock that is spotted with mineral. The veins on the surface to be cut by this tunnel show a width of from eighteen to twenty feet. The levels on the first vein are 40 feet each way, a out to pay all development work thus far. As each vein is encountered upraises will be made and levels started. An ore house is being erected, and when things are in readiness stoping will begin.

#### The Lead Market.

Values have declined for natural causes, viz., the arrivals of heavy quantities of lead from abroad and the almost entire abstention of consumers from the market. We hear that no further shipments ar being made from abroad, and as the west is not yet shipping any lead to eastern ports, it may be fairly assumed that a livelier market is to be looked for at the lower prices. Small transactions have taken place early in the week at 5.20@5.15, but later on 5.10 has been accepted. Consumption, which has been suffering some-what from the high prices, is now again going on at a very satisfactory rate.

The London market is also reported somewhat lower, Spanish being quoted at £14, and English at £14,5s.—Mining and

Ancient Chinese Miners in India.

An interesting discovery has been made on the Harnhalli gold mine in the Mysore, says the Indian Engineer. While sinking the main shaft the workmen broke into an old shaft, dug perhaps a thousand years or more ago. There were found mining implements of various kinds used by the ancient workers. It is supposed the workings were made by Chinese, of whose presence in Mysore there is unmis-takable evidence. The tools found are said to be very like those used by the Chinese and unlike anything known to be used by Hindus.

#### SAID TO HAVE SQUEALED

#### Jack Hennessy Believed to Have Peached on Burns.

PUGILIST ARRESTED

He Will Have to Satisfy a Jury That He Wasn't One of the Gang That Robbed the Italian, Anesta.

BUTTE, Nov. 20,-The STANDARD did not miss its guess very far this morning when it stated that Jack Hennessy, one of the men held for robbing the Italian Anesta would "squeal" in order to save imself. Hennessy is generally considered as a very slippery rascal whose knowledge of all kinds of crookedness has been learned through actual experience and who will not hesitate to "peach" on his confederates if by doing so he expeets to gain a point in his own favor.

This morning Hennessy sent a note to Marshal Daum requesting the officer to visit him at the jail. From hints Hennessy had let fall when being taken to jail, the day before, the marshal had a well defined idea of what was wanted of him and went prepared to learn more concerning the robbery than the officers

Just what Hennessy told the marshal is not known, but that he made a confes-sion of some kind is very apparent from the fact that no sooner had the marshal left the jail than did he cause a warrant to be issued for the arrest Jack Burns, the pugilist, on a charge of being an accom-plice to the robbery. The warrant was given to Officer Leyden, who soon found Burns and took him to the county jail. Burns had nothing to say when arrested, and apparently was not very much sur-

cused of having taken the money from Anesta's person while he and Roach were scuffling, the scuffling being a part of the

plot to rob the Italian.

At the examination of Roach and Hennessy, Burns was one of the witnesses for the defense and gave some very peculiar testimony. A policeman who was in the court room at the time quietly remarked that Burns was fully as quilty as the two that Burns was fully as guilty as the two men then under arrest, and gave it as his belief that Burns had received a fair share of the plunder. Subsequent events go to prove that the officer knew what he was

Should the testimony against Burns prove as strong as it is thought, it is more than probable that for some time at least he will be unable to get up a match with any heavy-weight, for which he has been very anxious for a couple of weeks.

BUTTE, Nov. 20.-The police made another arrest to-night in connection with the robbery of Pete Anesta, making four men now behind the bars charged with complicity in the crime. The party arrested to-night is Pat McCarthy, who was in the Morning Star saloon when the robbery occurred. It is thought that in his confession to the marshal this morning Hennessy implicated McCarthy, as well as Burns. McCarthy has been em-ployed as a miner in the Green Mountain until to-day, when he asked for his time and threw up his position. When arrested, he informed Officers Yaeger and Cantwell, who made the arrest, that he had heard of Burns' arrest, and intimated that he would have left the city during the night had he not been caught. had a check for two days' pay in his pocket when arrested. A peculiar fact in connection with McCarthy's arrest is that he was found in the very saloon in which the robbery took place.

#### THE RECORD OF CROOKS. ne Fellow Got Tired and Helped Him

self to a Bed and Bedroom,

BUTTE, Nov. 20,-Thomas Cavanaugh, Joe Gleason, John McDonald and Thomas Hanlon, the suspected crooks arrested grancy. Pleas of not guilty were entered jail to await hearing next Tuesday.

J. L. Carlisle, arrested for disturbing the peace, was discharged, nobody appegring against him to prosecute the

charge. Louis Vanhorn pleaded not guilty to assaulting E. F. Brookman.

James Dolan, arrested for assault and battery on complaint of his wife, was promptly on hand at the time set for hearing his case. Mrs. Dolan failing to ap-pear against him, he was discharged, and the costs were taxed up to the complain-

Ed Miller was fined \$5 and costs for Ed Miller was fined \$5 and costs for fighting. Sentence was suspended 24 hours to give him time to leave the city. Ed Blake was found guilty of being a vagrant and common pimp, and was ordered to leave the city within 24 hours.

Frank Rissenger, who almost pounded to death with a club James McGarrel, at the Butte Reduction works, Sunday night, was next placed on trial. It took only a short time to convince the court that he was guilty, and a fine of \$50 and costs was imposed. Notice of an appeal was

Sam Evans was tried on a charge of vagrancy and discharged.

The day's business closed with the trial of Piano Player Frake on the charge of or rano rayer France on the charge of intruding upon private premises without proper consent. Several nights since Frake snuggled in a bed in Fitchen's lodging house, where he was found by the night clerk. Frake was ordered to leave, and not going quick enough he and the clerk had a fight, in which Frake got decidedly the worst of it and was then arrested be-sides. At the trial it was brought out that Frake was not only a vagrant, but also a pensioner of unfortunate women, to which fact a couple of policemen testified. This settled his case. The court fined him 850 and costs and ordered him to leave the city and county immediately. Frake at once began to walk at a gait that left a

#### BETWEEN TWO CARS.

A Runaway Horse Squeezes Himself and

His Cart Into a Narrow Pass. BUTTE, Nov. 19 .- Front street in South Butte was the scene of a lively runaway about 2 o'clock this afternoon. The agent of the Red Star Yeast company was standing with his two-wheeled advertising cart in front of Shirley's store. Hitched to the vehicle was a stout grey horse with no little mettle. The agent had the lines in his hand and had gone around to the rear of the cart to take out a box of samples, when the animal became frightened and started across the motor track. The driver hung on for a few yards but was forced to relinquish his hold on the reins. Then the horse bounded away at a terrific rate down Front street, strewing along his trail in-numerable small packages of Red Star yeast and yellow advertising dodgers.
When the beast reached the Montana
Union tracks, he took a dive
over them, the gig barely touching the ground, but atreaming

behind him with the wheels nearly on a level with his head. When the animal would have let up it is hard to say, had he not got himself and cart wedged in tightly between two cars. There he had to stay and wait until he could be hitched. The horse escaped without apparent injury, but the gig has a badly smashed up wheel.

#### THEIR BONDS FORFEITED.

Two Men Charged With Attempting to Vote Hiegally Not in Court.
BUTTE, Nov. 20.—To-day John McConnell and Patrick Lennon, alias "Leonard," were to have been examined before U. S. Commissioner Dingevon on the charge of

attempted illegal voting. McConnell was arrested at precinct No. 10 for attempting to vote under the name of a registered voter who was out of th county on that day, while Lennon was arrested at precinct No. 13 for attempting to vote under the name of a man to vote under the name of a man who had already voted. Hearing of the cases was set for Noy. 13, but at the request of counsel for the defendants a continuance was granted until 2 o'clock this afternoon. When the commissioner called the cases to-day neither of the defendants appeared and the bonds of both \$1,000 each, were de-clared forfeited. John Doyle and Dan Terry were sureties for Leunon and J. A. Talbot and John Caddigan for McConnell.

The Thanksgiving Cock Fight, BUYTE, Nov. 19 .- Mr. Tonkin was asked to-night as to whether the cock fight talked about between Butte and Anaconda would come off on Thanksgiving night. Mr. Tonkin said that the fight must take place in Butte. Fourteen cocks will arrive from the East to-morrow evening and altogether there will be be-tween sixteen and twenty ready for the fray Thanksgiving night. The main must come off in Butte, how-The main must come off in Butte, how-ever. The Butte men refuse to go to An-aconda because they do not consider that they were well treated a year ago, when the lights were turned off in the middle of the main in Anaconda. Mr. Tonkin says he treated the Anaconda men well and will treat them well again if they will come to Butte. He says, how-ever, that the Butte birds will go to Ana-conda on Christmas eve if desired.

BUTTE, Nov. 33 .- The following trans fers were recorded at the office of the county clerk since our last report:

ert Sewell to R. A. Carde, the Stanlobert Sewell to R. A. Carde, the Stan-dard lode mining claim.

Colorado Smeiting and Mining Co. to
Uriah Seamans, lot 4 in block 9 of
Butte townsite.

Other A. Cooner to Charles Whiteside, one-half interest in the Violet
quartz mining claim.

Pickpockets in Town.

BUTTE, Nov. 20.—In addition to the sneak thieves who are annoying the people of the city, it appears that pickpockets have also arrived and propose to go into camp for winter. This afternoon Philip Stumpp made complaint to the police that he had been "touched" for his watch while standing in a crowd at one of the street corners. The thief who relieved him of his timepiece was no novice in that line of stealing, as he defuly broke the chain which secured the watch to Siumpp's vest. Stumpp did not miss the watch until he attempted to take it from his pocket to look at the time, when only the chain, which dangled from a buttonhole, remained to show that he ever pos

The Old Story.

BUTTE, Nov. 3.—Some time this morning James Oldvette complained to efficers Cantwell and Gabert that he had been last night, were arraigned in the police robbed of \$80, and accused Mary Gayette court this morning on the charge of va- of having stolen the money. He said that he had accepted an invitation from the by all of them and they were remanded to seductive Mary to visit her den, and while enjoying the hospitalities of the place his hostess had "gone through" his pace his hostess had "gone through" his pockets. This afternoon the woman was arraigned on a charge of grand larceny. She entered a pica of not guilty, and gave bonds for her appearance next Tuesday.

#### BONDS AND STOCKS.

Ups and Downs in Market Values on the Stock Exchange. NEW YORK, Nov. 20 .- Money was easy

throughout the day and silver showed some improvement. The resistance in the general list was stubborn, having the effect of maintaining the most of the list outside of grangers above last night's figures and the final changes to-night show a majority of advances. The close, however, was heavy and dull and close to the lowest prices of the day. Missouri Pacific is the only stock showing a material improvement and is 1¾ per cent. higher, while Rock Island is down 1¾ per cent. Government bonds steady.
